

VEST STYLE&DESIGN MANUAL

MTM Design Manual Instructions

Customer Notic

- 1 . The manual is used by business departments authorized by the platform; The business department can carry out the marketing promotion according to the market situation
- 2 . The option to insert "△" logo in the design manual is the default standard configuration in each design category
- 3 . If the customer does not choose other personalized design options in the type design category, that is, default on behalf of the customer, and the default standard configuration option is permitted, we will design and manufacture according to the default standard configuration.
- 4 . The design options in the same category in this design manual can only be selected, not repeated; Customers especially avoid contradictory or lack of logical design. For example, they choose "no pleated pants" and "pleat depth 3.2cm". They choose "no lining pants" and also choose " half front lining, pocketing is outside"
- 5 . When customers place orders through the platform, the options that involve the default configuration do not have to be entered into the system, but only the personalized style design options
- 6 . Personalized design options required by the customer as long as the manual is defined, the design code must be input. If the customer's personalized design cannot be met by hand, the application can be submitted to the platform. If the application is approved by the platform, the design code can be regularly classified, defined, summarized and published.
- 7 . We will constantly update the r&d and design options according to the market situation, and refine and improve the content of the existing design options according to the actual situation to make them clearer and update the versions regularly.
- 8 . The right to interpret the design manual belongs to RCMTM
- 9 . The customer has understood and accepted the above requirements before using this manual.
