Style&Design Manual

MTM Introduction

- 1 This manual can be used by business departments authorized by the platform: business departments can conduct market promotion
- 2 The option to insert " ÿ " logo in the design manual is the (default) standard configuration in each design category
- 3 If the customer does not choose other personalized design options in the category of style design, that is, default, licensing (default) standard configuration options on behalf of the customer, we will design and manufacture according to (default) standard configuration
- 4 This design manual is the same category of design options can only radio, do not check: customers especially to avoid conflict or lack of logic design, such as: the selection "before the left side vents (right single province)" and select "right before the vents (left single province)" choose "the invisible zipper after", and choose "after the invisible zipper, zipper to" and so on
- 5 When the customer passes the order under the platform, the option which involves the default configuration does not need to input into the system, only needs to input the personalized style design option
- 6 The personalized design options required by the customer can only be defined in the manual and must be input into the design code.
If the manual fails to meet the requirements of the customer's personalized design, the customer can apply to the platform. If the application is approved by the platform, the design code can be regularly classified, defined, summarized and published
- 7 We will continue to develop new design options according to the market situation. The description of the saved design options will be improved according to the actual situation to make them clearer and upgrade the version regularly.
- 8 This design manual explains right to RCMTM
- 9 The customer has understood and accepted the above requirements before using this manual
